

The easiest way to share documents in the front office.

# fi-6000NS

## Color Duplex Network Scanner

Turnkey network scanning solution with a small footprint and high performance

- ▶ Automatic image quality adjustment, automatic color detection, image deskew, automatic paper size detection and blank page detection and removal
- ▶ Small footprint makes it easy to install in a variety of locations
- ▶ Large touch screen display makes it easy to enter data and view images
- ▶ Built-in US 101 keyboard
- ▶ Robust 50-page Automatic Document Feeder (ADF) for hard and embossed card scanning as well as long document scanning.

**FUJITSU**

THE POSSIBILITIES ARE INFINITE

# fi-6000NS

## Color Duplex Network Scanner

The easy to use scanner for sharing documents in today's multi-location, global environment.

The Fujitsu fi-6000NS Network Scanner is the first scanner that combines the intuitive, easy installation of a desktop scanner with the productivity of a network scanner.

Network scanning, collaboration, emailing and faxing just got a lot easier. Simply load your documents, log into the network, select the destination, and press the scan button.

The fi-6000NS scans in color or monochrome at duplex speeds up to 50 ipm. And with a 600 dpi optical resolution, image quality is among the best in its class.

Not only does the network scanner offer ultrasonic double feed detection and long document scanning support (up to 34 inches), it also features hard card scanning capabilities (ISO7810 standard) and embossed card scanning through the main automatic document feeder (ADF). With a compact footprint of only 12.4 in. (W) x 10.8 in. (H) x 15.5 in. (D), the fi-6000NS installs easily into even the most crowded environments, including front office and back office locations.

**One machine that does the work of four.**

Its compact size isn't the only reason the fi-6000NS saves space. Because it can scan to a network fax system, scan to email, scan to PDF and scan to shared network folders, it also saves space — and money — by eliminating printers, fax machines, and scanners that are no longer needed. Not to mention the costly supplies and maintenance for those machines.

Featuring a large touch-screen display and a built-in US 101 keyboard, the Fujitsu fi-6000NS offers the same input capabilities as a computer. Need to email a document? Scan it, enter the email address and touch the send email icon. Need to share a document? Just scan it to a PDF and send it to the office next door, or to an office around the world.

Increase productivity and decrease costs. The fi-6000NS scanner does it all. With the Fujitsu 90-day warranty, along with our Advance Exchange or ScanCare programs, you can maximize your productivity and uptime.
