

Utilize all your image files,
no matter where they originate

Kodak Capture Pro Software— Auto Import Edition

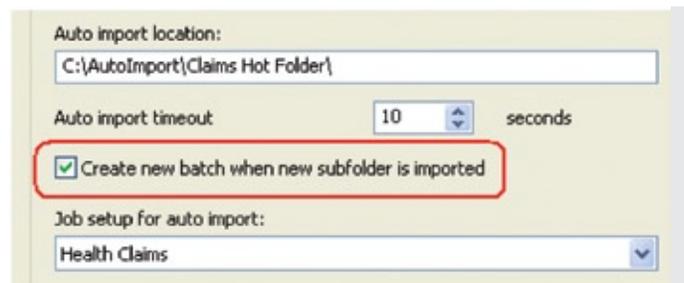

Expand your data capture capabilities

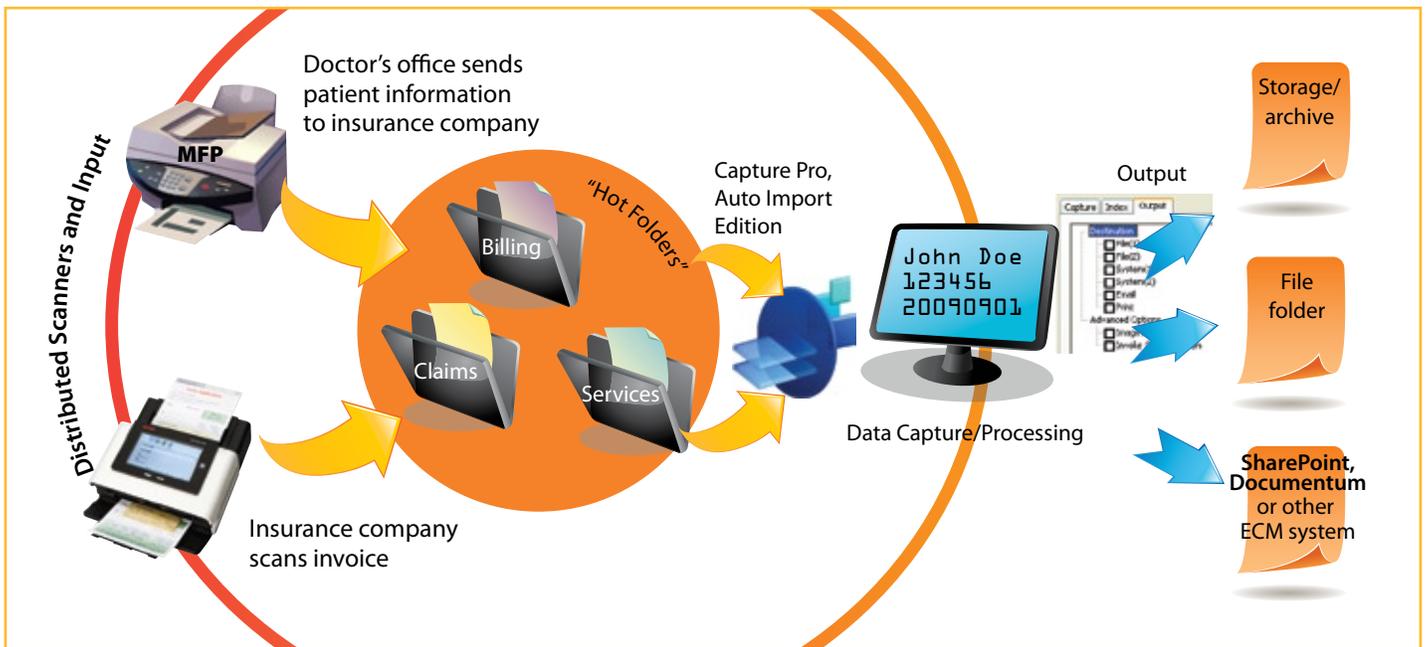

In today's distributed work environment, chances are you have image files that originated as faxes or e-mails, or were previously scanned with document scanners, multifunction printers (MFPs), large format scanners, book scanners, or other specialty input devices. You need to import these images into your capture workflow for indexing, document separation, image processing, and output to your ECM systems.

Now you can seamlessly achieve streamlined production capture of documents and data in a distributed environment, thanks to the Auto Import Edition of **Kodak Capture Pro Software**. Auto Import connects with designated "hot folders" on a network (instead of connecting to a scanner) and automatically brings images into Capture Pro Software for processing and output. Save time and money while achieving file consistency throughout your enterprise. Auto Import runs unattended and continuously, so no added operator expenses are incurred.

Fully automated, continuous import from "hot folders"

- Easily set up **Kodak Capture Pro Auto Import Edition** to continuously poll multiple directories or "hot folders" on your LAN for new images
- Each "hot folder" is associated with a specific Auto Import job setup (for automatic indexing, batch/document separation, output functions, etc.) and a page setup (for imaging functions like auto delete, image split, etc.)
- Auto Import then looks for sub-folders of images within designated "hot folders"
- Auto Import can be configured to create a new batch for each sub-folder of images imported
- Schedule auto import whenever it's most convenient and operate in background
- Supports import of TIFF (single- and multi-page), PDF, JPEG, JPEG 2000, BMP, GIF, CMP, IOCA, and MO:DCA files

Auto Import—an illustration of a distributed capture scenario in a healthcare setting

Perform critical imaging, indexing, and output functions

Automated—

- Indexing through barcode recognition
- Indexing via zonal OCR/MICR
- Batch and document separation
- Removal of blank pages
- Output to **Microsoft Sharepoint** (2007 and 2010), **EMC Documentum** and many other systems

Along with page splitting (as defined in your auto import page setup).

Kodak Capture Pro Software Auto Import Edition— for smarter document and data capture

It's the one application that gives you more scanning productivity, value and ease of use. **Kodak Capture Pro Software Auto Import Edition** connects to network folders and automatically imports image files—no matter where they originated. And it easily integrates with existing applications including ECM systems, databases, **Microsoft SharePoint** (2007 and 2010), **EMC Documentum** and more.

Now, this Auto Import Edition brings the power of Capture Pro Software to all of your documents and image files, delivering the automated image acquisition, indexing, and other capabilities that maximize the power of your data. Find out more today.

Please note: Auto Import Edition provides highly useful benefits for those with dedicated, distributed import requirements. Auto Import functionality is also offered in Kodak Capture Pro Software for Group E-G licenses. Ask your Reseller for complete details.
